PROFESSIONAL SUMMARY

Data Engineer with 7 years of experience turning raw operational data into trusted models, dashboards and decisions across media, agribusiness and supply-chain businesses in Ethiopia. Skilled in SQL, Python, dbt and Power BI, with hands-on experience designing dimensional models, building ELT pipelines and delivering self-service reporting for finance, sales, operations and leadership teams. Known for pairing strong engineering discipline with clear data storytelling, and currently deepening expertise in machine learning and the Microsoft Fabric ecosystem.

CORE SKILLS

Languages & Querying: SQL, Python (pandas, NumPy, scikit-learn), R, DAX

Data Engineering: dbt, ELT pipelines, dimensional modelling (fact & dimension tables), Microsoft Fabric, Azure SQL, query optimization, Git version control

BI & Visualization: Power BI (semantic modelling, DAX), Tableau, Streamlit, Matplotlib, Seaborn

Analytics & ML: Exploratory data analysis, KPI design, regression, classification, clustering, NLP (fundamentals)

Professional: Data storytelling, stakeholder management, cross-functional collaboration, problem-solving

PROFESSIONAL EXPERIENCE

Data Engineer Jul 2026 – Present

Hatch Africa — Addis Ababa, Ethiopia

- Build and optimize dbt-powered dimensional models (fact and dimension tables) in SQL and Python, exposing supply-chain, inventory and market-penetration KPIs that inform expansion decisions across Ethiopia and Africa.
- Engineer reusable ELT pipelines with version-controlled documentation, enabling operations, sales and finance teams to self-serve ad-hoc analysis and cutting reporting turnaround from days to hours.
- Audit and optimize Power BI semantic models and SQL views to improve refresh performance, data accuracy and maintainability.
- Develop Streamlit web applications on Azure SQL for NPS and recruitment analytics, giving managers interactive access to performance metrics.

Reporting Analyst Apr 2024 – Jun 2026

EthioChicken — Addis Ababa, Ethiopia

- Designed and delivered Power BI dashboards for Finance, Logistics, Procurement, Sales and Production, giving each function a single source of truth for its core KPIs.
- Built a vaccine analytics suite tracking inventory, distribution and usage end to end, improving visibility across the supply chain.
- Performed exploratory data analysis in Python and SQL to surface actionable insights that shaped operational and commercial decisions.
- Optimized SQL queries and Python workflows, significantly reducing data processing time and report latency.

Data Analyst Aug 2019 – May 2024

MultiChoice Ethiopia — Addis Ababa, Ethiopia

- Consolidated sales data from multiple sources into structured datasets aligned with business requirements.
- Produced clear visual reports and presentations on sales performance for stakeholders across the organization.
- Supported management with recurring performance tracking, turning complex data into concise, decision-ready insights.

EDUCATION

BSc, Electrical and Computer Engineering 2012 – 2016

Jimma University — Jimma, Ethiopia

LICENSES & CERTIFICATIONS

- Microsoft Certified: Fabric Data Engineer Associate — Microsoft
- Advanced SQL for Data Engineering — 365 Data Science
- Data Visualization with Tableau Specialization — Coursera
- The Complete SQL Bootcamp: Go from Zero to Hero — Udemy
- AI Career Essentials — ALX Ethiopia
